

PERFORMANCE EVALUATIONS

Performance evaluation reviews are completed annually for all employees. This process has been enhanced through our newly designed wePerform system where both employee and manager have the opportunity to provide feedback, discuss and mutually come to an agreed plan for performance goals and expectations.

In addition to our regular performance review, feedback sessions have been added as an enhancement component, with the intent to offer you a more frequent opportunity to meet with your manager and voice any concerns or improvement ideas you may have. We have worked extensively with our partners in IT to automate this entire process, including sending notifications when your evaluation is due, to ensure the progress is seamless and offers you an opportunity and adequate time to prepare.
